

How to Use this Template

1. Make a copy [File → Make a copy...]
2. Rename this file: “**Capstone_Stage1**”
3. Replace the text in green

Submission Instructions

1. After you’ve completed all the sections, download this document as a PDF [File → Download as PDF]
2. Create a new GitHub repo for the capstone. Name it “**Capstone Project**”
3. Add this document to your repo. Make sure it’s named “**Capstone_Stage1.pdf**”

Student Monitoring System

Description

This application provide information like as

- Student Attendance
- Results
- Mid-Semester Marks
- Time Table etc...

Intended User

Parents and Students

Features

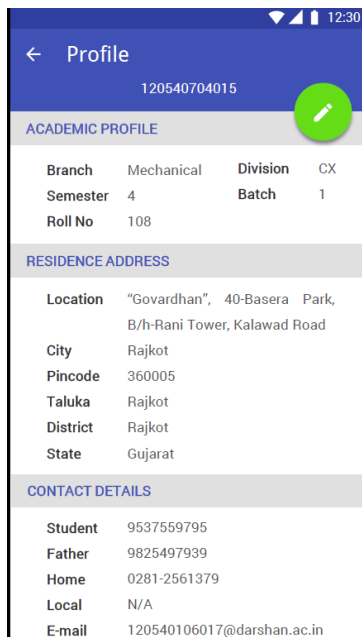

List the main features of the app.

- Student Profile
- Students' Attendance
- Students' Results

User Interface Mocks

These can be created by hand (take a photo of your drawings and insert them in this flow), or using a program like Photoshop or Balsamiq.

Screen 1

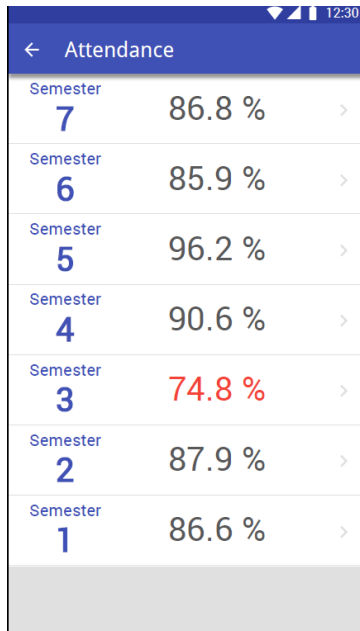

ACADEMIC PROFILE			
Branch	Mechanical	Division	CX
Semester	4	Batch	1
Roll No	108		

RESIDENCE ADDRESS	
Location	"Govardhan", 40-Basera Park, B/h-Rani Tower, Kalawad Road
City	Rajkot
Pincode	360005
Taluka	Rajkot
District	Rajkot
State	Gujarat

CONTACT DETAILS	
Student	9537559795
Father	9825497939
Home	0281-2561379
Local	N/A
E-mail	120540106017@darshan.ac.in

Student Profile Screen

Screen 2

Semester	Attendance	
7	86.8 %	>
6	85.9 %	>
5	96.2 %	>
4	90.6 %	>
3	74.8 %	>
2	87.9 %	>
1	86.6 %	>

Students' Attendance Screen

Add as many screens as you need to portray your app's UI flow.

Key Considerations

How will your app handle data persistence?

Through Web Service

Describe any corner cases in the UX.

For example, how does the user return to a Now Playing screen in a media player if they hit the back button?

Describe any libraries you'll be using and share your reasoning for including them.

For example, Picasso handle the loading and caching of images.

Describe how you will implement Google Play Services.

Not Using

Next Steps: Required Tasks

This is the section where you can take the main features of your app (declared above) and decompose them into tangible technical tasks that you can complete incrementally until you have a finished app.

Task 1: Project Setup

Write out the steps you will take to setup and/or configure this project. See previous implementation guides for an example.

You may want to list the subtasks. For example:

- Configure libraries
- Something else

If it helps, imagine you are describing these tasks to a friend who wants to follow along and build this app with you.

Task 2: Implement UI for Each Activity and Fragment

List the subtasks. For example:

- Build UI for DashboardActivity
- Build UI for ProfileActivity
- Build UI for AttendanceActivity
- Build UI for ResultActivity

Task 3: Your Next Task

Will Implement Web Services for all the activities
